Professional Summary

I'm not just building websites—I'm weaving stories in code. Full-stack developer fluent in React, TypeScript, Node.js, MongoDB, and Tailwind. I craft sleek fintech-style apps, resume generators, booking platforms, and portfolios that feel sculpted, not slapped together. I write clean, well-thought-out code, and I write about it too. I'm the mix of tradition, precision, and forward-thinking that recruiters crave.

Key Skills

Frontend:	React, Next.js, TypeScript, Tailwind, Bootstrap, HTML5, CSS3
Backend:	Node.js, Express, MongoDB
Other:	Technical Writing, Communication, Problem-Solving

Professional Experience

weeMake & Moscow Tech Hub – Full Stack Developer (2025 – Present)

Built scalable, polished web apps—fintech-adjacent, clean, and effective.

DericsGroup – Full Stack Developer (2024 – 2025)

Crafted solid frontend-backend integrations with cross-team collaboration and clean, maintainable code.

Portfolio & Projects

- Fintech App MVP – Full-stack fintech application with authentication and transaction features.
- Personal Portfolio Website – Animated, interactive showcase built with React, TypeScript, Tailwind, MongoDB.
- Fashion Designer Booking Website – Modern booking system with Google Auth, light/dark mode, and animations.
- Resume Builder Tool – A TypeScript & Node.js mini-app that generates professional resumes.
- Healtrack Healthcare Website – Clean, responsive healthcare interface with thoughtful UX.
- Kindred Spark Landing Page – Smooth transitions and subtle animations—landing magic.
- Africa-Focused Web Project – Currently designing a high-impact project with clear monetization strategy.
